

EXPERIMENT 6: LIBRARY BOOK ISSUE REQUEST FORM USING ZOHOCREATOR

Topic: Library Book Issue Request Form

Roll Number: 2116240701226

Name:KANIJA FATHIMA J

AIM

To design and develop a functional **Library Book Issue Request Form** using **Zoho Creator**, demonstrating the effective utilization of all thirteen Basic Field types available in the Form Builder, field-level validation, report generation, and workflow-based processing of library book issue requests.

OBJECTIVE

The objective of this experiment is to develop a low-code library management application that enables library members to submit book issue requests through an online form. The application collects member information, contact details, book requirements, borrowing purpose, preferred collection schedule, and acknowledgement of library rules.

The application also provides a structured report for library staff to review, filter, and process submitted requests efficiently.

APPLICATION DETAILS

Component	Details
Application Name	Library Book Issue Management
Form Name	Book_Issue_Request_Form
Report Name	Book_Issue_Request_Report
Platform	Zoho Creator
Primary Users	Students, Faculty, and Staff
Application Type	Low-Code Application
Purpose	Digital management of library book issue requests

4. BASIC FIELDS USED

The **Book_Issue_Request_Form** incorporates all thirteen Basic Fields available in the Zoho Creator Form Builder.

S.No.	Basic Field	Form Field Name	Purpose
1	Name	Member_Name	Captures the complete name of the library member.
2	Email	Email_Address	Records the member's email address for communication.
3	Address	Hostel_Residential_Address	Records the hostel or residential address.
4	Phone	Contact_Number	Captures the member's contact number.
5	Single Line	Register_Roll_Number	Records the register, roll, or employee number.
6	Multi Line	Purpose_Of_Borrowing	Records the purpose of borrowing the requested book.
7	Number	Number_Of_Copies	Specifies the number of copies requested.
8	Date	Preferred_Issue_Date	Records the preferred date for collecting the book.
9	Time	Preferred_Collection_Time	Records the preferred collection time.
10	Drop Down	Book_Category	Provides a single selection for the book category.
11	Radio	Member_Type	Records the membership category of the requester.
12	Multi Select	Subject_Areas_Of_Interest	Allows selection of multiple relevant subject areas.
13	Checkbox	Agree_To_Library_Rules	Records acknowledgement of library rules and return policy.

FORM LAYOUT

The form is organized into four sections to provide a structured and user-friendly interface.

Section A – Member Details

The section contains:

- Member Name
- Register/Roll Number
- Member Type

Section B – Contact Details

The section contains:

- Email Address
- Contact Number
- Hostel/Residential Address

Section C – Book Request Details

The section contains:

- Book Category
- Subject Areas of Interest
- Number of Copies
- Purpose of Borrowing

Section D – Scheduling and Acknowledgement

The section contains:

- Preferred Issue Date
- Preferred Collection Time
- Library Rules Agreement

VALIDATION RULES

Field-level validations are implemented to ensure data accuracy and completeness.

Mandatory Fields

The following fields are configured as mandatory:

- Member Name
- Contact Number
- Register/Roll Number
- Member Type
- Book Category
- Library Rules Agreement

Email Validation

The Email field uses the built-in email validation mechanism to ensure that the entered value follows the required email format.

Phone Validation

The Phone field is configured to support the appropriate Indian phone number format.

Number Validation

The **Number Of Copies** field is restricted to a minimum value of **1** and a maximum value of **5**.

Date Validation

The **Preferred Issue Date** field is configured to prevent the selection of dates earlier than the current date.

Checkbox Validation

The **Agree_To_Library_Rules** checkbox is mandatory, ensuring that the form cannot be submitted without acknowledgement of the library rules and return policy.

WORKFLOW OF THE APPLICATION

The application follows a structured workflow for submitting and processing book issue requests.

Step 1 – Form Access

The library member accesses the **Book_Issue_Request_Form** through the designated online form link.

Step 2 – Form Submission

The member enters the required personal, contact, book, scheduling, and acknowledgement information.

Step 3 – Validation

Zoho Creator validates the submitted information according to the configured mandatory, format, range, and date validation rules.

Step 4 – Record Creation

After successful validation and submission, the request is stored as a new record in the **Book_Issue_Request_Report**.

Step 5 – Confirmation

An automated confirmation mechanism can be configured to communicate the status of the request to the member through the registered email address after the availability verification process.

Step 6 – Request Processing

Library staff review the submitted records through the report, apply appropriate filters based on **Book Category** and **Preferred Issue Date**, verify availability, and arrange the requested books according to the specified collection schedule.

REPORT GENERATION

The **Book_Issue_Request_Report** provides a centralized view of all submitted book issue requests.

The report enables library staff to:

- View submitted requests.
- Verify member information.
- Review requested book categories.
- Check the number of copies requested.
- Filter requests according to book category.
- Filter requests according to preferred issue date.
- Review preferred collection times.
- Process requests based on availability.

The report therefore provides a structured method for managing and processing library book issue requests.

This screenshot shows the configuration interface for the 'Library Issue Management Book Issue Request Form'. It is divided into three main sections: 'Basic Fields', 'Field Properties', and 'Field References'.

- Basic Fields:** A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down.
- Field Properties:** A list of fields with their respective properties. Fields include Member Name, Email Address, Hostel/Residential Address, Phone Number, Roll Number, Purpose of Borrowing, Number of Copies, Preferred Issue Date and Time, Book Category, and Member Type.
- Field References:** A section for defining field references, including a 'Field name' (e.g., 'I agree to library rules and regulation'), a 'Field link name' (e.g., 'I_agree_to_library_rules_and_regulation'), and a 'View Field References' link.

This screenshot shows the user interface of the 'Library Issue Management Book Issue Request Form'. It features a sidebar with navigation options: 'Library Issue Management', 'Book Issue Request Form', 'Book Issue Request Form Report', and 'Book Issue Request Form'. The main form area contains the following fields:

- Member Name:** First Name and Last Name.
- Email Address:** Email Address.
- Hostel/Residential Address:** Address Line 1, Address Line 2, City / District, State / Province, Postal Code, and Country.
- Phone Number:** Phone Number (with a dropdown for country code, currently showing +91).
- Roll Number:** Roll Number.
- Purpose of Borrowing:** Purpose of Borrowing.

RESULT

The **Library Book Issue Request Form** was successfully developed using **Zoho Creator**. The application incorporates all thirteen Basic Field types, appropriate validation rules, structured form sections, report generation, and a defined workflow for processing library book issue requests. The experiment demonstrated the practical application of low-code development for digitizing and managing a library service process.
