Setting Up a Zoho Creator Account and Exploring the Platform Architecture and Interface

1. Aim

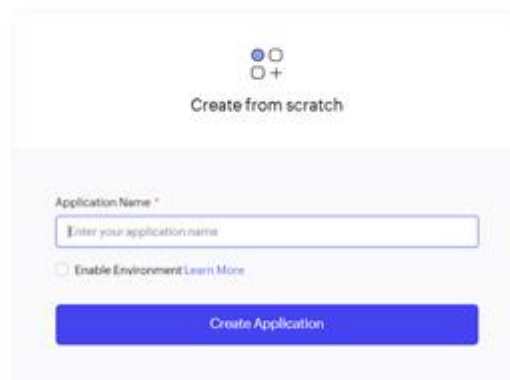

To create and configure a **Zoho Creator** account, develop a sample application using forms, reports, and dashboards, and explore the **Develop, Deploy, and Manage** sections of the Zoho Creator platform.

2. Setting Up Zoho Creator

I) Creating the Sample Application

Procedure

1. Open the Zoho Creator website and sign in using a Zoho account.
2. Select **Create Application** from the Zoho Creator home page.
3. Choose **Create from Scratch** or select a suitable application template.
4. Enter the application name, for example **Student Management System**.
5. Create the application.
6. Add the required forms, reports, and dashboards to the application.
7. Save and test the application.

The image shows a screenshot of the Zoho Creator 'Create from scratch' interface. At the top, there are two icons: a blue circle with a white plus sign and a white square with a black plus sign. Below these icons is the text 'Create from scratch'. The main form area has a label 'Application Name *' above a text input field. Inside the input field, there is a placeholder text 'Enter your application name'. Below the input field, there is a checkbox labeled 'Enable Environment' followed by a link 'Learn More'. At the bottom of the form, there is a large blue button with the text 'Create Application'.

II) Creating a Form

A **Form** is used to collect and store data in the Zoho Creator application.

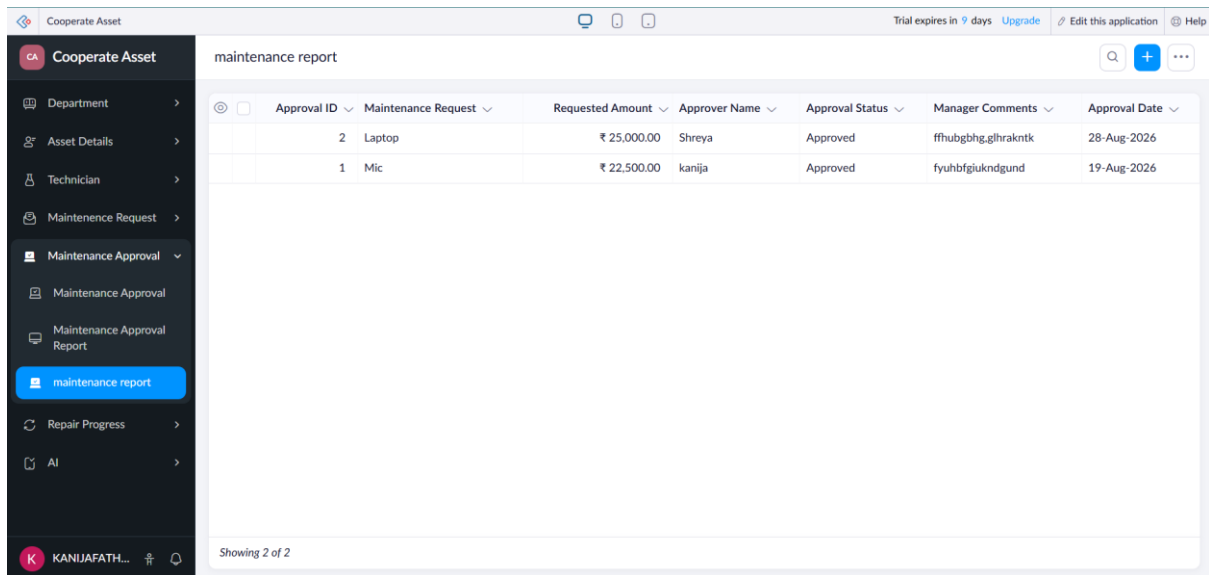

1. Open the application.
2. Go to **Develop**.
3. Select **Create** → **Form**.
4. Enter the form name as **Student Form**.
5. Drag and drop the required fields.
6. Configure the field properties.
7. Click **Done/Save**.
8. Add sample student records.

III) Creating a Report

A **Report** is used to view, organize, filter, and analyze the data collected through forms.

Procedure

1. Go to the **Develop** section.
2. Select **Create** → **Report**.
3. Choose **Student Form** as the data source.
4. Select a report type such as **List Report** or **Table Report**.
5. Select the required fields.
6. Save the report.
7. Add or modify records to observe the report.

The screenshot shows the 'Cooperate Asset' application interface. The left sidebar contains a menu with options: Department, Asset Details, Technician, Maintenance Request, Maintenance Approval, Maintenance Approval Report, maintenance report (highlighted), Repair Progress, and AI. The main content area displays a table titled 'maintenance report' with the following data:

Approval ID	Maintenance Request	Requested Amount	Approver Name	Approval Status	Manager Comments	Approval Date
2	Laptop	₹ 25,000.00	Shreya	Approved	ffhubgbhg.ghrakntk	28-Aug-2026
1	Mic	₹ 22,500.00	kanija	Approved	fyuhbfgiukndgund	19-Aug-2026

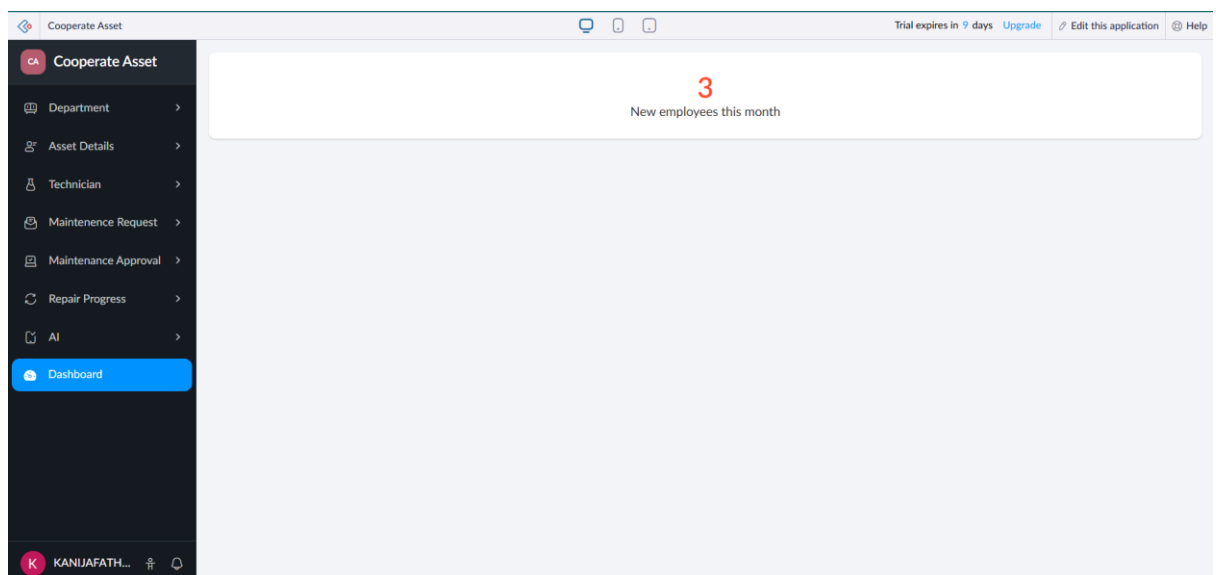

Showing 2 of 2

IV) Creating a Dashboard

A **Dashboard** provides a visual representation of application data using charts, panels, and summaries.

Procedure

1. Open the application.
2. Go to **Create** → **Dashboard**.
3. Enter the dashboard name as **Student Dashboard**.
4. Add charts and panels.
5. Select the Student Report as the data source.
6. Configure the required chart type.
7. Save and preview the dashboard.

3. Exploring the Zoho Creator Platform Architecture and Interface

A) Develop

1. The **Develop** section is used to create and customize applications in Zoho Creator.
2. It allows users to create **forms, reports, pages, workflows, and dashboards**.
3. Developers can also use **Deluge scripting** to add automation and custom functionality.

B) Deploy

1. The **Deploy** section is used to publish and make applications available to users.
2. Applications can be accessed through web browsers and supported devices after deployment.
3. It provides options to control application access, permissions, and user availability.

C) Manage

1. The **Manage** section is used to manage application settings, users, permissions, and data.
2. Administrators can monitor the application and control user access and security settings.
3. It helps maintain the application and manage its overall configuration.

Result

Thus, a **Zoho Creator account** was successfully set up and a sample **Student Management System** application was created using forms, reports, and dashboards. The **Develop, Deploy, and Manage** sections of the Zoho Creator platform architecture and interface were also explored successfully.
